

Hamza Farooq

AI Developer & Builder

London, UK • hamzaf14@gmail.com • linkedin.com/in/hamza-farooq-ai • github.com/Hamzas-github • hamzas-github.github.io

SUMMARY

I build with AI tools instead of writing code by hand. Using Claude, Codex and Cursor I've shipped a portfolio chatbot that replies in a clone of my own voice (Cloudflare Worker, Groq, ElevenLabs), EyeSpeak, a browser-based eye-tracking communication board, and a fintech fraud pipeline that flags risky card transactions. My foundation is data and AI: Python, SQL, LLMs and RAG, plus an MSc in Artificial Intelligence and Data Science. Rather than leaning on a single generation, I drive models through a disciplined engineering pipeline: define scope and architecture, build a minimal prototype, iterate in small commits, test every path with written test cases, then QA and deploy.

SKILLS

AI build tools: Claude, Codex, Cursor, AI-directed shipping, rapid iteration

Build & ship: JavaScript, Python, HTML/CSS, Cloudflare Workers, API integration (Groq, ElevenLabs), web apps

Data & ML: SQL, SQLite, pandas, Power BI, LLMs, RAG, computer vision (MediaPipe, WebGazer)

Quality / QA: self-owned QA, manual + automated testing, Cypress, Selenium

PROJECTS

AI Portfolio Chatbot

First-person chatbot that answers as me and reads each reply aloud in a clone of my own voice. Framework-free widget on a Cloudflare Worker proxying Groq (LLM) and ElevenLabs (voice) with keys kept server-side, finished with an iOS-style liquid-glass UI. Directed AI tools end-to-end.

EyeSpeak — Eye-Tracking Communication Board

Webcam AAC board that lets someone speak by looking at a card and blinking. Real-time gaze tracking and blink detection running entirely on-device in the browser (WebGazer, MediaPipe, Web Speech API). Live demo available.

Fintech Fraud & Risk Monitoring

London-fintech-style fraud pipeline: synthetic card transactions → Python validation → SQLite warehouse → SQL risk queries → investigation queue with dashboard-ready fraud KPIs.

E-commerce Sales & Customer Analytics

~1M real online-retail sales lines turned into a commercial story: revenue seasonality, RFM segmentation, cohort retention and a Power BI dashboard built around the questions a retail business actually asks.

EXPERIENCE

Shopify Developer — MUVA (Client, London)

2025 – Present · Remote

- Designed and shipped wearemuva.com, a custom Shopify storefront built end-to-end to the client's specification.
- Engineered bespoke Shopify Liquid with Codex and Claude Code, going beyond drag-and-drop theme editing to custom-coded layouts and functionality.

Website Quality Assurance — SMB Team

Mar 2024 – Apr 2025 · Remote

- Ran detailed QA testing for marketing websites across browsers and devices.
- Enforced internal SOPs and responsive-design standards; owned bug reporting end-to-end.

Freelance Web Developer — Upwork

Jan 2017 – Present · Remote

- Delivered 100+ client projects, from full website builds to custom e-commerce solutions.
- Built responsive, secure, SEO-optimised sites (WordPress, PHP, JavaScript); shipped fast and iterated on client feedback.

EDUCATION

MSc Artificial Intelligence & Data Science — University of Hull (London Campus)

2025 – 2026

BSc Computer Software Engineering — COMSATS University Islamabad

2017 – 2021
